BIOELECTROCHEMISTRY AND BIOENERGETICS

Subject Index of Volume 36

Acetyl phosphate
Fe(III)-ion-catalysed non-enzymatic transformation of adenosine diphosphate into adenosine triphosphate part II. Evidence of catalytic nature of Fe ions (Kitani et al.) 47
Actinomycin
Voltammetry of adsorbed cancerostatic actinomycins (Ibrahim et al.) 149
Adsorption processes
Voltammetry of adsorbed cancerostatic actinomycins (Ibrahim et al.) 149
Alkane thiol adsorption
Study of glucose oxidase on Pt electrode modified by alkane thiol (Dong et al.) 73
Amperometric assay
Amperometric assay based on an apoenzyme signal amplified using NADH for the detection of FAD (Hiratsuka et al.) 157
Anticancer activity
Electrochemistry of thiobarbiturates: correlation of structure with reduction potential and drug activity (Ames et al.) 171
Antigen–antibody
Electrochemical transduction of an immunological reaction via s–BLMs (Wang et al.) 145
ATP
Fe(III)-ion-catalysed non-enzymatic transformation of adenosine diphosphate into adenosine triphosphate part II. Evidence of catalytic nature of Fe ions (Kitani et al.) 47
Aurantimycins
Formation of membrane pores by aurantimycins A and B, new lipopeptide antibiotics from *Streptomyces aurantiacus* (Grigoriev et al.) 57

Bacteriorhodopsin
Electrical oscillation in lipid-impregnated porous membrane filter and its modulation by a light-driven proton pump, bacteriorhodopsin (Ikematsu et al.) 61
Bilayer lipid membranes
Reconstituted olfactory receptors in bilayer lipid membranes (Zviman, Tien) 127
Biosensors
Electrochemical transduction of an immunological reaction via s–BLMs (Wang et al.) 145
BLMs
Electrochemical transduction of an immunological reaction via s–BLMs (Wang et al.) 145

Cell orientation
Effects of static magnetic fields on erythrocyte rheology (Higashi et al.) 101
Chemotherapy
Treatment of B16 mouse melanoma with the combination of electropermeabilization and chemotherapy (Heller et al.) 83
Chromosome aberrations
Study of effects of 50 Hz magnetic fields on chromosome aberrations and the growth-related enzyme ODC in human amniotic cells (Galt et al.) 1
Effects of 50 Hz sinusoidal magnetic fields and spark discharges on human lymphocytes in vitro (Paile et al.) 15
Clastogenic agents
Study of effects of 50 Hz magnetic fields on chromosome aberrations and the growth-related enzyme ODC in human amniotic cells (Galt et al.) 1
c-myc
Electric and magnetic noise blocks the 60 Hz magnetic field enhancement of steady state *c-myc* transcript levels in human leukemia cells (Lin, Goodman) 33
Condensed film
Voltammetry of adsorbed cancerostatic actinomycins (Ibrahim et al.) 149
Copper
A kinetic investigation on Fe and Cu,Zn superoxide dismutases by polarography (Argese et al.) 165

D.c. polarography
Polarographic behavior of flavanoids from propolis and their potential carcinogenity (Vachálková et al.) 137
Dielectric parameters
Numerical analysis of the influence of experimental conditions on the accuracy of dielectric parameters derived from electrorotation measurements (Gascoyne et al.) 115
DNA damage
Estimation of genetic effects of a static magnetic field by a somatic cell test using mutagen-sensitive mutants of *Drosophila melanogaster* (Koana et al.) 95
Drosophila melanogaster
Estimation of genetic effects of a static magnetic field by a somatic cell test using mutagen-sensitive mutants of *Drosophila melanogaster* (Koana et al.) 95

Electric and magnetic field
Electric and magnetic noise blocks the 60 Hz magnetic field enhancement of steady state *c-myc* transcript levels in human leukemia cells (Lin, Goodman) 33
Electric discharges
Effects of 50 Hz sinusoidal magnetic fields and spark discharges on human lymphocytes in vitro (Paile et al.) 15

Electron transport
Electron transport in biological procesess. II: Electrochemical behaviour of Q_{10} immersed in a phospholipidic matrix added on a pyrolitic graphite electrode (Sánchez et al.) 67
Electropermeabilization
Treatment of B16 mouse melanoma with the combination of electropermeabilization and chemotherapy (Heller et al.) 83
Electrorotation measurements
Numerical analysis of the influence of experimental conditions on the accuracy of dielectric parameters derived from electrorotation measurements (Gascoyne et al.) 115
ELF
Evidence for genotoxic effects of resonant ELF magnetic fields (Tofani et al.) 9
ELF field effects
Study of effects of 50 Hz magnetic fields on chromosome aberrations and the growth-related enzyme ODC in human amniotic cells (Galt et al.) 1
Enzyme activity
A kinetic investigation on Fe and Cu,Zn superoxide dismutases by polarography (Argese et al.) 165
Enzyme electrode
Study of glucose oxidase on Pt electrode modified by alkane thiol (Dong et al.) 73
Erythrocyte impedance
Impedance study of erythrocyte aggregation and sedimentation by piezoelectric crystal sensor (Hui et al.) 161
Erythrocyte sedimentation
Impedance study of erythrocyte aggregation and sedimentation by piezoelectric crystal sensor (Hui et al.) 161
Excision repair
Estimation of genetic effects of a static magnetic field by a somatic cell test using mutagen-sensitive mutants of *Drosophila melanogaster* (Koana et al.) 95

FAD sensor
Amperometric assay based on an apoenzyme signal amplified using NADH for the detection of FAD (Hiratsuka et al.) 157
Fe(III) ion
Fe(III)-ion-catalysed non-enzymatic transformation of adenosine diphosphate into adenosine triphosphate part II. Evidence of catalytic nature of Fe ions (Kitani et al.) 47
Flavanoids
Polarographic behavior of flavanoids from propolis and their potential carcinogenity (Vachálková et al.) 137
FMN
Amperometric assay based on an apoenzyme signal amplified using NADH for the detection of FAD (Hiratsuka et al.) 157

Genotoxic effects
Evidence for genotoxic effects of resonant ELF magnetic fields (Tofani et al.) 9
Genotoxicity
Estimation of genetic effects of a static magnetic field by a somatic cell test using mutagen-sensitive mutants of *Drosophila melanogaster* (Koana et al.) 95
Glucose oxidase
Study of glucose oxidase on Pt electrode modified by alkane thiol (Dong et al.) 73
Growth-related enzyme
Study of effects of 50 Hz magnetic fields on chromosome aberrations and the growth-related enzyme ODC in human amniotic cells (Galt et al.) 1
Guinea pig gall-bladder epithelium
Large-conductance K^+ channels and their regulation in epithelial cells of guinea pig gall-bladder (Meyer) 23
Localization of large-conductance K^+ channels of guinea pig gall-bladder epithelium studied using isolated cells or primary cell cultures (Meyer, Doppierio) 77

Hanging mercury drop electrode
Voltammetry of adsorbed cancerostatic actinomycins (Ibrahim et al.) 149
Human amniotic cells
Study of effects of 50 Hz magnetic fields on chromosome aberrations and the growth-related enzyme ODC in human amniotic cells (Galt et al.) 1
Human lymphocytes
Evidence for genotoxic effects of resonant ELF magnetic fields (Tofani et al.) 9
50 Hz magnetic field
A 50 Hz sinusoidal magnetic field induces changes in the membrane electrical properties of K562 leukaemic cells (Santini et al.) 39

Iron superoxide dismutase
A kinetic investigation on Fe and Cu,Zn superoxide dismutases by polarography (Argese et al.) 165

K562 erythroleukaemic cells
A 50 Hz sinusoidal magnetic field induces changes in the membrane electrical properties of K562 leukaemic cells (Santini et al.) 39

Large-conductance K^+ channels
Large-conductance K^+ channels and their regulation in epithelial cells of guinea pig gall-bladder (Meyer) 23
Localization of large-conductance K^+ channels of guinea pig gall-bladder epithelium studied using isolated cells or primary cell cultures (Meyer, Doppierio) 77
Lipid impregnation
Electrical oscillation in lipid-impregnated porous membrane filter and its modulation by a light-driven proton pump, bacteriorhodopsin (Ikematsu et al.) 61
Lipopeptide antibiotics
Formation of membrane pores by aurantimycins A and B, new lipopeptide antibiotics from *Streptomyces aurantiacus* (Grigoriev et al.) 57
Lymphocytes
Effects of 50 Hz sinusoidal magnetic fields and spark discharges on human lymphocytes in vitro (Paile et al.) 15
Lysophosphatidylcholine monolayer
Effect of electrostatic interaction on hydrolytic activity of phospholipase A_2 at the polarized oil–water interface (Kondo, Kakiuchi) 53

Magnetic fields
Evidence for genotoxic effects of resonant ELF magnetic fields (Tofani et al.) 9
Effects of 50 Hz sinusoidal magnetic fields and spark discharges on human lymphocytes in vitro (Paile et al.) 15
Maxwell–Wagner effect
A 50 Hz sinusoidal magnetic field induces changes in the membrane electrical properties of K562 leukaemic cells (Santini et al.) 39
Melanoma
Treatment of B16 mouse melanoma with the combination of electropermeabilization and chemotherapy (Heller et al.) 83

Membrane electrical properties
A 50 Hz sinusoidal magnetic field induces changes in the membrane electrical properties of K562 leukaemic cells (Santini et al.) 39
Membrane filter
Electrical oscillation in lipid-impregnated porous membrane filter and its modulation by a light-driven proton pump, bacteriorhodopsin (Ikematsu et al.) 61
Membrane pore formation
Formation of membrane pores by aurantimycins A and B, new lipopeptide antibiotics from *Streptomyces aurantiacus* (Grigoriev et al.) 57
Membrane receptor
Reconstituted olfactory receptors in bilayer lipid membranes (Zviman, Tien) 127
Micronuclei
Evidence for genotoxic effects of resonant ELF magnetic fields (Tofani et al.) 9
Effects of 50 Hz sinusoidal magnetic fields and spark discharges on human lymphocytes in vitro (Paile et al.) 15
Monolayer culture
Changes in cell proliferation due to environmental non-ionizing radiation. 1. ELF electromagnetic fields (Kwee, Raskmark) 109
Mutagen-sensitive mutants
Estimation of genetic effects of a static magnetic field by a somatic cell test using mutagen-sensitive mutants of *Drosophila melanogaster* (Koana et al.) 95
Mytomycin-C
Evidence for genotoxic effects of resonant ELF magnetic fields (Tofani et al.) 9

NADH
Amperometric assay based on an apoenzyme signal amplified using NADH for the detection of FAD (Hiratsuka et al.) 157
Noise
Electric and magnetic noise blocks the 60 Hz magnetic field enhancement of steady state *c-myc* transcript levels in human leukemia cells (Lin, Goodman) 33
Non-enzymatic phosphorylation
Fe(III)-ion-catalysed non-enzymatic transformation of adenosine diphosphate into adenosine triphosphate part II. Evidence of catalytic nature of Fe ions (Kitani et al.) 47
Numerical analysis
Numerical analysis of the influence of experimental conditions on the accuracy of dielectric parameters derived from electrorotation measurements (Gascoyne et al.) 115

Oil–water interface
Effect of electrostatic interaction on hydrolytic activity of phospholipase A_2 at the polarized oil–water interface (Kondo, Kakiuchi) 53
Olfaction
Reconstituted olfactory receptors in bilayer lipid membranes (Zviman, Tien) 127
Ornithine decarboxylase
Study of effects of 50 Hz magnetic fields on chromosome aberrations and the growth-related enzyme ODC in human amniotic cells (Galt et al.) 1

Phosphatidylcholine monolayer
Effect of electrostatic interaction on hydrolytic activity of phospholipase A_2 at the polarized oil–water interface (Kondo, Kakiuchi) 53
Phospholipase A_2
Effect of electrostatic interaction on hydrolytic activity of phospholipase A_2 at the polarized oil–water interface (Kondo, Kakiuchi) 53
Piezoelectric sensor
Impedance study of erythrocyte aggregation and sedimentation by piezoelectric crystal sensor (Hui et al.) 161
Polarographic method
A kinetic investigation on Fe and Cu,Zn superoxide dismutases by polarography (Argese et al.) 165
Potential carcinogenity
Polarographic behavior of flavanoids from propolis and their potential carcinogenity (Vachálková et al.) 137
Proliferation stimulation
Changes in cell proliferation due to environmental non-ionizing radiation. 1. ELF electromagnetic fields (Kwee, Raskmark) 109
Propolis
Polarographic behavior of flavanoids from propolis and their potential carcinogenity (Vachálková et al.) 137
Proton pump
Electrical oscillation in lipid-impregnated porous membrane filter and its modulation by a light-driven proton pump, bacteriorhodopsin (Ikematsu et al.) 61

Reconstitution
Reconstituted olfactory receptors in bilayer lipid membranes (Zviman, Tien) 127
Riboflavin
Amperometric assay based on an apoenzyme signal amplified using NADH for the detection of FAD (Hiratsuka et al.) 157

Saturation kinetics
A kinetic investigation on Fe and Cu,Zn superoxide dismutases by polarography (Argese et al.) 165
Self-assembly
Study of glucose oxidase on Pt electrode modified by alkane thiol (Dong et al.) 73
Sister chromatid exchanges
Effects of 50 Hz sinusoidal magnetic fields and spark discharges on human lymphocytes in vitro (Paile et al.) 15
Skin fibroblasts
Changes in cell proliferation due to environmental non-ionizing radiation. 1. ELF electromagnetic fields (Kwee, Raskmark) 109
Static magnetic field
Estimation of genetic effects of a static magnetic field by a somatic cell test using mutagen-sensitive mutants of *Drosophila melanogaster* (Koana et al.) 95
Supported BLMs
Electrochemical transduction of an immunological reaction via s–BLMs (Wang et al.) 145

Tautomerization
Electrochemistry of thiobarbiturates: correlation of structure with reduction potential and drug activity (Ames et al.) 171
Transcript
Electric and magnetic noise blocks the 60 Hz magnetic field enhancement of steady state *c-myc* transcript levels in human leukemia cells (Lin, Goodman) 33
Tumour treatment
Treatment of B16 mouse melanoma with the combination of electropermeabilization and chemotherapy (Heller et al.) 83

Ubiquinone
Electron transport in biological procesess. II: Electrochemical behaviour of Q_{10} immersed in a phospholipidic matrix added on a pyrolitic graphite electrode (Sánchez et al.) 67
UV exposure
Estimation of genetic effects of a static magnetic field by a somatic cell test using mutagen-sensitive mutants of *Drosophila melanogaster* (Koana et al.) 95
Voltammetry
Voltammetry of adsorbed cancerostatic actinomycins (Ibrahim et al.) 149
Zinc superoxide dismutase
A kinetic investigation on Fe and Cu,Zn superoxide dismutases by polarography (Argese et al.) 165
